**Section 2:** Technical Information (type of supplier being sought, reason for scout, manufacturing process, dimensions, tolerances, performance specifications, required materials, required certifications, regulations, and additional comments)

Seeking Thermo Scientific as a supplier as they are already a supplier of IonBench for their Mass Spectrometers (of which we have multiple instruments). IonBench is a French company and therefore the products are made in France. We have no requirements other than the benchtops meet the general requirements listed above and they are specifically stated to work with our instrument brand/models.

**Section 3:** Business Information (business volume, target price, delivery and packaging requirements, and additional comments)

Target Price should be around \$6000-\$7500 per bench top (\$29,000 max for all four). Should be shipped fully or mostly assembled via freight to:

6201 Congdon Blvd, Duluth, MN 55804, USA

Section 4: Additional Information (attach drawings, photos, specifications, etc.)

(See Attached brochures of IonBench models.)
