

# CYBERSECURITY: What's all the hype?

When it comes to cybercrimes there used to be two types of organizations:

- 1) those that *have* suffered a cyberattack, and
- 2) those that *will* suffer a cyberattack

That is no longer the case.

Today, there are two types of organizations:

- 1) those that *are aware* they have suffered a cyberattack, and
- 2) those that *are not aware* they have suffered a cyberattack

Which type of organization are you?

What steps are you taking to protect your organization?

Do you have a plan in place? Do you need a plan?

Do you know what a cyberattack looks like?

Not sure where to start?

# CYBERSECURITY STRENGTHENS U.S. MANUFACTURERS

Cybersecurity protects the confidentiality, integrity and availability of your information.  
A cybersecurity program provides advantages for small and mid-sized manufacturers:

**Improve Recovery  
Times After Disruptions**

**Avoid Potential Losses**

**Protect Valuable Data**

**Ensure Employee and  
Customer Privacy**

**Mitigate Risks**

## Reality of Cyber Attacks and Breaches

**61%** of small businesses have experienced a cyber attack in the past 12 months.

**58%** of cybercrime victims are identified as small businesses.

**34%** of all documented attacks targeted manufacturers.

**\$60K** is the median cost of a data breach.

## Common Types of Attacks and Breaches

## 5 Steps to Reduce Cyber Risks

Protecting the information of your company, employees, and customers is an ongoing process. Manufacturers will benefit from a program that:

## ⚠ Defense Suppliers: Compliance ⚠

Manufacturers in the DoD supply chain had until **December 31, 2017** to be in compliance with new DFAR cybersecurity requirements.
