The researcher's current projects include:

Measure of the neutron lifetime; measurement of neutron spin rotation, fast neutron detection and spectroscopy

The researcher uses the following instrumentation:

NIM-based hardware, digital hardware, vacuum systems, neutron beams, cryogenics, magnetic field systems, particle detectors (photons and charged particles)

The Researcher is proficient in software including:

Igor Wavemetrics, C programming

If this Offer of Assistance matches your needs, please [submit a MATTR request](#).
