

Lean Enterprise Certification Program for High Performance Manufacturing

Virtual Classroom - Beginning October 27th

The next session of the Lean Enterprise Certification Program for High Performance Manufacturing (LECP-HPM) is scheduled to start October 27th. **This session will be presented virtually.**

The Impact Dakota LEAN Enterprise Certification Program for High Performance Manufacturing (LECP-HPM) helps businesses achieve higher profitability by building internal capability and capacity to improve QUALITY, COST, and DELIVERY performance. This is the only nationally-certified and recognized program for Lean Certification in the country and is applicable to manufacturers and non-manufacturers.

FDA Food Safety Modernization Act (FSMA)

Preventive Controls for Human Food Training

Virtual Classroom - January 12-14

One of the most significant FDA rules is the Preventive Controls for Human Food rule. This rule states that every human food manufacturer, except for the very smallest who will have modified requirements, must have somebody on staff who has completed a Preventive Controls for Human Food class.

This three-day event will prepare you for the REQUIRED facility Food Safety Plan as well as ongoing verification of the plan.

QUALITY MANAGEMENT SYSTEM TRAINING OPPORTUNITIES

ISO9001:2015 Internal Auditor Training

Virtual Classroom - January 20-21

ISO9001 is the Quality Management System that many businesses use as the foundation upon which they add their unique industry requirements. Many firms are already ISO Certified, and many more are becoming certified as their customers require it or they are trying to attract new business.

Don't Believe the Myths About AI in Manufacturing

Overwhelmed by the prospect of implementing AI on your production floor? It's not expensive. You do not need a team of experts. If you value uptime and overall equipment efficiency (OEE), you may be ready for AI. Read more about how this accessible technology can realize rapid ROI and differentiate your company from the competition in the process with this article from an MEP National Network™ AI expert published in *IndustryWeek*.

Suspicious Minds: Non-Technical Signs Your Business Might Have Been Hacked

When it comes to cybersecurity, learning that observing your environment is an important part of staying safe. Even if your employees have no technical understanding of information technology, they can help identify signs that your business may have been hacked.

Small and medium-sized manufacturers (SMMs) are prime targets for cyber-attacks, according to the U.S. Department of Homeland Security, because many do not have adequate preventive measures in place. Manufacturing is the second most targeted industry. According to Accenture, only 14 percent of small businesses are prepared to defend themselves against cyber threats.

How Healthy is Your Organization?

Companies are challenged with continuously reducing cost, increasing flexibility, and decreasing lead times while still providing their customers with high-quality products.

In an effort to help North Dakota's manufacturers, Impact Dakota is expanding its on-site, no-cost assessment of your manufacturing business to identify and discuss opportunities that can help with improved productivity of your resources. The approach to this assessment is based on principles of LEAN manufacturing which focuses on reduction of wastes helping companies achieve higher levels of productivity in their production and operations. As part of this assessment, in a very friendly but purposeful way, the Impact Dakota staff walk the shop floor to observe, evaluate, and discuss your production and supporting operations. Following the on-site visit a brief summary report reflecting observations and outline of recommendations will be provided.
