

An Invitation to Participate

Impact Dakota, the official representative of the MEP National Network in North Dakota, is hosting the 2018 Impacting Manufacturing Conference.

As part of this event we are inviting companies to exhibit their products and services in support of manufacturing.

The target audience for this conference includes representatives from manufacturing and supporting businesses from North Dakota and beyond. The conference will provide numerous networking and communication opportunities and include a number of presentations on people development, organizational excellence, and leadership.

The Conference will also include a Trade Show Social, which will provide another opportunity for participants to interact with the vendors.
